Abstract

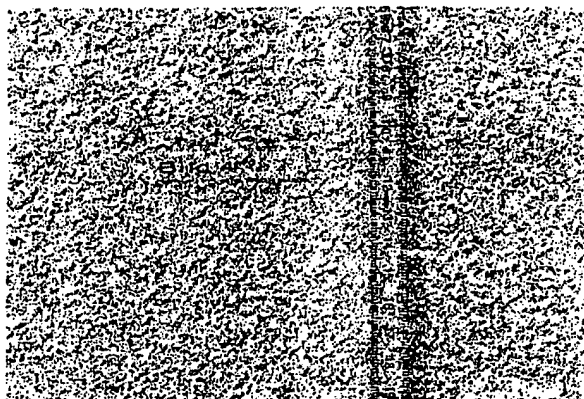

Sprayable coating agent, its production, further processing and use

A sprayable coating agent is disclosed in the form of granules with which the granules are compacted to form a pressed piece, subsequently ground up and optionally sieved, whereby the granules have the following particle-size distribution: 0% - 40% by weight: 0 - 600 μm ; 5% - 55% by weight: 600 - 1250 μm ; 5% - 95% by weight: > 1250 μm ; or 15% by weight: 0 - 800 μm ; 0% - 85% by weight: 800 - 2000 μm ; 0% - 15% by weight: > 2000 μm . Likewise disclosed are its production, further processing and use for internal and external applications.
